

Communications Services for the Deaf
Text Version of Presentation on Paging Answering Services
October 30, 2002

Convert your 2-way pager into a virtual office. Pager Answering Services.

Stuck at the airport? No TTY? You have a text pager...your buddy has a cell phone!

Your car has overheated...you are miles from anyone.

CSD has the key to solving communication problems...convert your 2-way pager into a virtual office.

Pager Answering Service (PAS) converts your two-way pager into a universal communication tool, allowing the same communication capabilities of cell phone users! Enjoy an expanded mobile communication capability!

Creates a "virtual office" for two-way pagers, with a live operator assisting and relaying information to those who do not have paging capabilities.

Text messages from your two-way pager are relayed into voice, TTY or another communication mode of your preference. No need for a portable TTY.

Excellent for mobile emergency situations...use your two-way pager to contact: road repair, towing services, police, ambulance, fire department.

The user can order pizza while on the way home and have it waiting, hot on your doorstep...or be notified by a babysitter with updates on the status of the children.

Service is available 24 hours a day, 365 days per year, with 10 agents of which 1 is using VRS.

Endless capabilities in communications: complete freedom to contact anyone, anywhere, anytime.

CSD - your key to stress relief. Advance into modern communications.

Problem: Stuck in traffic running late; need to alert wife's family...they only have a cell phone at the picnic.

Solution: Pager Answering Services. Text page CSD operators; they make a call to the family picnic to let them know that you are stuck in traffic...the CSD operators also text page a message back to you letting you know that the family has the message and that the family also wanted to let you know everything is fine.

Problem: Your daughter's soccer practice was canceled...the coach is trying to contact you....he has no text paging capabilities.

Solution: You have provided the coach with your toll-free telephone number to the CSD Pager Answering Services. The CSD operators are paging you within a few seconds.
